NUIX NEO DISCOVER

Conquer the complexities of eDiscovery and legal review with Nuix Neo Discover. Powered by industry-leading processing, cutting-edge artificial intelligence, advanced automation, and the flexibility to deploy in any environment, Nuix Neo Discover empowers legal teams to tackle even the most complex cases faster, easier, and smarter with confidence.

The rising volume and complexity of electronically stored information is overwhelming legal professionals. Unwieldy datasets, cost pressures, intricate review processes and the intense scrutiny to ensure no evidence is overlooked, leave legal teams facing burnout, and frustrated by inefficiencies and resource constraints. Privacy concerns and adherence to evolving global legal and regulatory standards add another layer of complexity, particularly in cases involving sensitive or cross-jurisdictional data. These mounting challenges place immense pressure on legal teams conducting eDiscovery and legal review.

Nuix Neo Discover reimagines eDiscovery with highly automated, scalable, AI-enabled workflows that support faster, more precise reviews, expedite reporting, and minimize resource demands. Powered by proprietary responsible Cognitive AI (CogAI), AI-enabled search and over 500 pre-built eDiscovery tuned models, Nuix delivers industry-leading eDiscovery and legal review. With continuous active learning (CAL) refining and accelerating review, Nuix Neo Discover helps to uncover critical evidence and ensures no detail goes unnoticed. Nuix Neo Discover equips legal teams to overcome challenges, eliminate inefficiencies, and tackle every case with confidence. Coupled with the flexibility to deploy in any environment, Nuix Neo Discover delivers the innovation, precision, speed, and flexibility to help organizations achieve exceptional eDiscovery and legal review.

ADVANTAGES OF NUIX

For years, Nuix has been the gold standard for legal teams tackling complex eDiscovery. Nuix Neo Discover combines the trusted foundation of Nuix Discover with cutting-edge capabilities of the Nuix Neo platform. Nuix Neo Discover accelerates time to insight, empowering legal professionals to conduct comprehensive eDiscovery and legal review with unmatched speed and precision. Nuix Neo Discover equips legal professionals with:

> Responsible AI: Nuix combines no-code ethical AI with advanced tools like predictive coding, sentiment analysis, and CogAI, to streamline evidence categorization with precision and speed. With features including AI-driven predictions, advanced data visualization capabilities to identify patterns and key documents, data enrichment, entity recognition, and extraction Nuix delivers explainable, defensible results, and faster insights.

> AI-enhanced review: Expedite document review and case preparation with advanced analytics and CAL to revolutionize initial and linear review workflows. Every coding decision improves the relevance of future review assignments.

> Industry-leading processing: Ingest and analyze vast amounts of case data with ease. Advanced models for clustering, mapping, and graphing transform complex case details into clear, actionable insights.

> Multi-jurisdictional production: Nuix Neo Discover is engineered to meet multi-jurisdictional production requirements with built-in, configurable quality control rules and automation.

> Over 1,000 file types supported: Nuix Neo Discover aggregates data sets from disparate sources, analyzing more than 1,000 file types at speed.

> **Cohesive collaboration:** Combine collective knowledge in real time. With a single window into litigation data, case strategy, evidence and reports, insights are shared securely, streamlining collaboration while maintaining control and compliance.

> **Multi-tenant capabilities:** Nuix provides robust and secure data management, ensuring privacy and reliability for law firms, corporations, and government agencies.

> **Secure and reliable:** Nuix Neo Discover holds globally recognized certifications including ISO 27001, and SOC 2. Combined with 99.9% uptime in our SaaS environment, and zero-downtime upgrades, it ensures seamless and uninterrupted operations.

RESPONSIVE REVIEW, DEPLOYED YOUR WAY:

Nuix Neo Discover delivers unmatched flexibility to deploy in cloud, on-prem, or hybrid environments, harnessing AI-driven workflows and advanced automation to uncover vital evidence with precision, reliability, and confidence – redefining the standards of legal review and eDiscovery.

Nuix is an established authority for regulators, law firms, and law enforcement. With Nuix Neo Discover organizations can:

Start Fast – Quickly ingest data and start reviewing in minutes – No load files, no exports, backed by a full portfolio of analytics and visualizations.

Identify Gaps – Highlight inconsistencies in your collection or a production from opposing counsel. Identify data missing from key custodians, an important timeframe, topic or event.

Analyze Case Data – Unlock a complete understanding of your case with Nuix's powerful AI. Leverage AI-driven document analysis, data mining, concept clustering and predictive coding to gain a clear, strategic review of case data.

Minimize Risk – Automate PII identification and redaction to ensure regulatory compliance and confidentiality.

Rapid Review – Industry-leading processing and advanced automations streamline and elevate linear review, reducing manual effort and expediting critical insights, so you can make faster decisions in a single view.

Flexible Deployment – Cloud, on-prem, or hybrid to accommodate any business model. With SaaS deployments offering elasticity in times of large or urgent caseloads.

THE FUTURE, AT YOUR FINGERTIPS

With Nuix Neo Discover, you're choosing a platform dedicated to your future. Nuix's ongoing innovation will bring new capabilities like semantic search, AI-assisted bulk redaction, AI-driven first pass review, and document summarization to customers in the near future.

WHO NEEDS NUIX NEO DISCOVER FOR LEGAL REVIEW?

Organizations, law enforcement, regulators, legal departments, legal service providers, and law firms need Nuix Neo Discover to power their legal review capabilities with responsible AI and advanced automation – deployed in the environment of their choice.

Ask yourself:

> Can you choose between on-prem, cloud or hybrid for your eDiscovery needs? And benefit from responsible AI and automation in your legal review workflows?

> How do you manage the growing volume of electronically stored information (ESI) that requires legal review?

> How do you meet multi-jurisdictional production requirements, quickly and securely?

> Do you know what sensitive data you may inadvertently be including in case data sent to third parties for review?

> How do you ensure compliance with regulatory requirements in eDiscovery?

> What is the impact on you or your client of failing to review case data in an accurate, timely manner?
